

## Experiment-3

Aim: Design of Google Logo using GIMP.

Steps:

1. Created a new file with equal width and height and white background.
2. Added horizontal and vertical guides.
3. Using ellipse tool and taking reference from guides created a circle.
4. The selected circle is then converted to path.
5. Created two texts using text tool.
6. Select a text and choosed text to path to put that text on the circle.
7. Created a transparent layer that will display the selected text.
8. The selected text is then filled with color.
9. Using rotate tool the layer having text is rotated as per needed.
10. Now Flip tool is used on the path of the circle so that the second text shows in opposite direction.
11. Steps 6 to 9 are repeated for second text.
12. At last google logo is added and adjusted using sacle tool(to scale the image) and then using ellipse tool circle is extrated and pasted on the background layer.
